Lagos, Nigeria.

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with hands-on experience delivering responsive, scalable, and SEO-optimized web applications for startups, tech companies, and private clients. Skilled in ReactJS, JavaScript, TailwindCSS, and REST API integration with strong expertise in performance optimization, maintainable component architecture, and accessibility. Proven ability to transform business requirements into intuitive user interfaces and build production-ready systems—including landing pages, e-commerce platforms, dashboards, and SaaS applications. Certified in JavaScript, Python, and Generative AI, bringing research-driven thinking, clean coding practices, and problem-solving to modern frontend engineering.

EXPERIENCE

Frontend Developer - GFI Website (Live)

Freelance | 2025

- Developed a fully responsive and high-performance landing page for GFI using React, JavaScript, and TailwindCSS.
 - Implemented a clean, scalable component architecture with mobile-first UI/UX optimization.
 - Enhanced SEO through semantic HTML, metadata optimization, and lightweight asset delivery.
 - Improved loading speed using lazy loading, optimized images, and minimized bundle size.
 - Worked directly with stakeholders to refine interface layouts and brand consistency.
-

Frontend Developer — Wristwatch E-Commerce Website (Production Build)

Freelance | 2025

- Built a production-ready e-commerce platform for Kedar Watches featuring product catalog, cart logic, checkout workflows, and admin management.
 - Implemented reusable React components for product display, filtering, authentication, and order systems.
 - Integrated secure payment gateway and REST APIs for a seamless online shopping experience.
 - Designed and built an admin dashboard for product uploads, inventory updates, and sales oversight.
 - Improved platform performance through lazy loading, optimized state management, and code splitting.
 - Ensured accessibility, SEO optimization, mobile responsiveness, and cross-browser compatibility.
-

Frontend Developer — Author Portfolio Website (Live)

Freelance | 2025

<https://omak-charlie-books.vercel.app/>

- Built a fully responsive portfolio website using React and TailwindCSS.
 - Integrated Mailchimp API to automate newsletter subscriptions.
 - Verified the site on Google Search Console and implemented SEO improvements.
 - Created fast-loading, user-friendly pages with clean navigation and optimized images.
-

Frontend Developer — JK Giants Innovations (Remote)

Freelance / Volunteer | Apr 2025 – Aug 2025

- Developed responsive web applications using React, TypeScript, and TailwindCSS.

- Integrated REST APIs including authentication, payments (Paystack), wallet funding, and user profile management.
 - Refactored frontend code, implemented lazy loading, and optimized performance across multiple pages.
 - Collaborated with backend teams in Agile sprints to test endpoints, fix bugs, and improve app reliability.
 - Designed reusable components, modals, and polished loading and feedback states.
-

Frontend Developer Intern (Remote)

FlexiSAF Edusoft Limited, Abuja | May 2024 – Aug 2024

- Contributed to building accessible React-based applications using WCAG best practices.
 - Optimized application performance using code splitting and component-level lazy loading.
 - Reviewed pull requests and improved code clarity across team repositories.
 - Built responsive UI components and collaborated on backend API integrations.
-

PROJECTS

CryptoGlancer — Cryptocurrency Tracker (In Progress)

<https://crypto-glance-beryl.vercel.app/>

- Developed real-time cryptocurrency dashboards with live API integration.
- Implemented responsive layouts, dynamic UI states, and optimized rendering for fast data updates.

Gamers Community Platform - 2023

- Building console sections, leaderboards, tournaments, and events using modular vanilla JavaScript components.
- Designed with mobile responsiveness and interactive UI elements.

Internship Database Website — FlexiSAF

- Developed responsive frontend components and integrated backend APIs.
 - Implemented clean layouts using HTML, CSS, and React.
-

EDUCATION

B.Tech., Industrial Mathematics - Federal University of Technology, Akure (FUTA)
Nov 2015 – Oct 2021

CERTIFICATIONS

- Programming with JavaScript — Meta (2023)
 - Generative AI (Foundation, Medium, Master) — Microsoft (2025)
 - AI for Beginners — HP (2025)
 - Python Bootcamp — Nobel Work Foundation (2022)
-

TECHNICAL SKILLS

Languages & Frameworks:

JavaScript, TypeScript, React, HTML, CSS, TailwindCSS, Python, SQL

Tools & Version Control:

Git, GitHub, Bitbucket, VSCode, npm, yarn, Webpack

Testing & Debugging:

Jest, Chrome DevTools, Debugging, Code Optimization

Design & Prototyping:

Figma, UI/UX, Responsive Design, Design-to-Code

Core Competencies:

RESTful APIs, SEO Optimization, Accessibility (WCAG), Performance Tuning, Linux
